Arizona List recommends NO votes on all eight legislative referrals (they are 100s or 300s.) The extremist Republicans in the legislature placed anti-democratic measures on the ballot to get around Governor Hobbs veto pen. You have the opportunity to veto these bills yourself by voting NO. Veto these efforts to limit voters' rights and give politicians more power. It won't seem clear. They have sneaky titles, fine print and unintended consequences. Fight back. Just vote **NO.**

However, pay attention to all of the local referrals (400s): Local propositions, including critically needed school bonds and overrides, are in the 400s. We urge you to vote yes on all bonds and overrides, and support local schools and communities.
